

Young Debater School

Project Goals: The Young Debater School (YDS) aimed at advancing organizational and debating skills of young people through the 3 days' workshop at Shohin International Camp during March 21-24, 2021. The participants were 10 YDS members who were working on the development of the debate community in the Sugd region at that moment.

Project Leader: Dilshod Hamroboev, ICP-118

"I know there are a lot of [young] people who are also not motivated and [not] informed about the opportunities; thus, I am doing projects to support youth to get education, practice leadership, and start community work."

Project Results: Project participants' feedback:

- "The project was informative, helpful and productive. We had a lot of fun. Also it included many practical parts. So it was very helpful for us."
- "I am so grateful for being able to participate in this project because it gave me an understanding of many aspects of organizational skills as well as research and argumentation skills."

Not an object, but a human being

Project Goals: To inform young girls about sexual and any kind of violence, and increase their knowledge on the rape preventive measures with the help of volunteers through introductory talks, brochures, and illustrations in the southern regions of Kyrgyzstan (i.e., Osh and Jalal-Abad).

Project Leader: Aizada Almazbekova, ANTH-119

"[...] we want to provide moral support to minors and explain what measures must be taken in order to prevent rape; if it happened, then explain what to do before, during and after the rape of minors."

Project Results: Around 500 school students participated in the workshops and received valuable brochures with all necessary information related to the sessions' content at the end.

"We would be happy if our project will help even one girl."
