AUCA AI Policy

Instructors can set individual policies on regulating the utility of generative AI and other tools in their courses provided they:

a) set clear policies, whether permitting or prohibiting some or all tools;

b) communicate them clearly in their individual course syllabi. Students who are unsure of such policies in their courses should ask respective course professors for clarification.

In addition, such statement and the link https://auca.kg/en/code_of_conduct1/ to the Code of Student Rights, Responsibilities, and Conduct shall be a mandatory inclusion in every academic program syllabus of AUCA.

Approved by the Academic Senate on January 11, 2024
