Social skills and competences

Working with people is my profession. I am used to work in groups as well as with groups and institutions, with colleagues and students, with customers, employees and competitors. Liability is an important social skill I learned through mediation and within my judge's work. Social competence is proved by the attitude of a mediator. Thus my communication skills are mainly given by that expanded also by a long term experience in judgements, settlements and negotiations. Due to my work in companies and projects I also learned about a customer related communication in all the manners.

The ability of networking is a consequence at least by the work of a chairman and founder of integrated mediation e.V. which is situated in several EU countries. Beside that the establishment of social networks was part of my professional work as a family judge, as well as the provider of public projects.

Fortunately I gained the ability to adapt to multicultural environments, though my work experience abroad i.e. in Russia, Latvia, Austria, Swizz, BiH, Croatia, Estonia, Iraq, Italy and Cyprus countries where I used to have lectures, trainings, consultations as well as some mediation practise.

Organisational skills and competences	<p>While working as a judge I was used to integrate mediation skills in court procedures. Today we call this way of proceeding "integrated mediation" in which the techniques of proceeding are described precisely.</p> <p>There were already many seminars and courses I was asked to built up and to conduct in Germany and abroad. I was involved along the whole process from planning to realisation on every level of work (concept, logistics, advertising, design, management, administration, evaluation, monitoring, assessment).</p> <p>Experience in project or team management I could gain through several projects. As those were in different fields i.e. in IT section, education, consultancy and business, my view on how to achieving results increased.</p> <p>In the fields of research, I could develop and help developing concepts for evaluation of projects including achieve of surveys, reporting and monitoring.</p> <p>As the founder of two firms (soft-use GmbH and win-management GmbH) and an NGO (Integrierte Mediation e.V.) I could gain a lot of experience in finding and gathering resources available to built up an expanding company (soft-use had 21 employers at least) as well as an NGO (actually with more than 200 members).</p>
Technical skills and competences	<p>When I was responsible for software development at least in cooperation with a huge media company and publishing house (Haufe Mediengruppe) I got aware of how to implement quality management and controlling on highest professional level. The same time I learned a lot about marketing (creating and selling products). It's a real advantage to use that knowledge in different fields especially in mediation surroundings and when organising seminars or conferences for example, what I did afterwards.</p> <p>For teaching mediation I created a toolbox with all the items and offers needed in mediation and ADR procedures. The training material was built on the base of variant media including web and video. Actually I am the editor of a huge internetproject which is called Wiki to Yes (www.mediationswiki.de) where everything will be provided in regard of ADR. This portal will also be provided in several languages.</p>
Computer skills and competences	<p>As software developer I am very well informed about using computers and programs. Also I am trained in using and developing office software in all the manners as well as WEB, design, communication and publishing programs.</p>
Artistic skills and competences	<p>Those skills I learned by producing training material for mediators like films (i.e. "magic of mediation"), e-books, books, web-pages, where I could design a corporate identity with all the needs around.</p>
Other skills and competences	<p>Living mediation</p>
Driving licence	<p>Classes 1 and 3,4,5 (cars, vans and motor cycles)</p>
